

OFF-THE-SHELF. OR CUSTOM. WE'LL FILL YOUR APPLICATOR SPECIFICATIONS FLAWLESSLY.

OUR VAST ARRAY OF SYNTHETIC AND NATURAL APPLICATORS WILL EXCEED YOUR NEEDS. WANT OPTIONS? WE'VE GOT OPTIONS.

In a world that's ever more complex, technology-driven and precision-based, it's important to get a partner that's as focused on your manufacturing process as you are. That's us.

We're Designetics, the acknowledged leader in fluid application systems and solutions. After all, we understand your competition never rests—and the measure of your success relies on flawless execution, less spoilage and tight control over manufacturing.

FULLY AUTOMATIC

FLEXIBLE MANUFACTURING

WE BUILT AN INDUSTRY

More than 30 years ago, an automotive manufacturer came to us with a challenge: make a better way to apply fluid to assembly line windshields. And so, we created an industry—and have been adapting, growing and innovating ever since to give our clients the best possible fluid application solutions and systems.

Sometimes, that means creating fluid applicators from scratch, sourcing just the right materials in an exacting manufacturing process to provide our clients with perfect—and repeatable—results every time. And sometimes, that means sitting down with clients and mapping out their production process, outlining ways Designetics products can improve their workflow. And sometimes, it means creating automated solutions, tapping into robotics to ensure precise and focused fluid application and results.

OPPORTUNITIES ABOUND

CONSISTENT RESULTS

REDUCED WASTE

REDUCTION IN ENVIRONMENTAL HAZARDS

GROW

Regardless, working with Designetics—in whatever form—offers manufacturers unmatched opportunities. Opportunities like task repetition with consistent results. Opportunities like reduced waste, because accurate application means less spoilage and scrap. Opportunities like a significant reduction in environmental hazards from adhesive and fluid spillage or airborne chemicals. And, opportunities for you to grow, thrive and ultimately beat your competition.

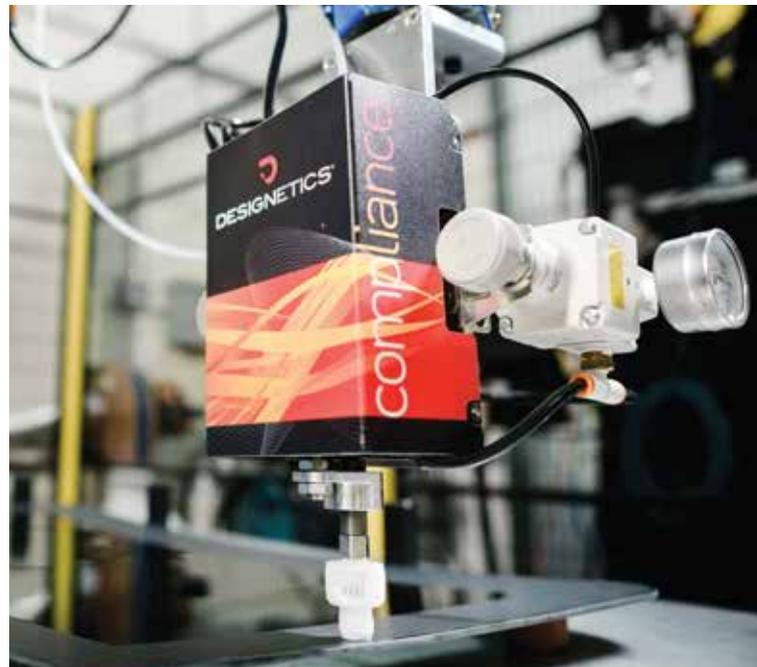

Any engagement with us begins with our time-tested process. And, it's really pretty simple: we listen. Instead of rushing to force-fit a solution or selling products we already have... we listen. We listen to your challenges, your needs, what keeps you up at night.

SOLUTIONS-BASED, SUCCESS-DRIVEN

Then, we roll up our sleeves and get to work. It may mean creating fluid application solutions from scratch. Or it may mean customizing existing applicators... or using any of our thousands of existing ones. It may mean integrating our industrial dispensing equipment in concert with applicators into your manufacturing chain. Or it may even mean customizing a never-been-done-before brand new solution.

Whatever the case, we work with you every step of the way. That means employing our time-tested process, where we map out your manufacturing cycle to determine best fits. Then, we brainstorm to create rapid prototypes of our solution, and recreate your manufacturing process at our expansive facilities to refine our products to work flawlessly. Then, and only then, do we bring it to you. But we don't stop there. We conduct on-site tests in a real-world environment at your facility to ensure perfect results.

HELPING YOU GROW

Our products and solutions have made leaders in countless industries run smarter, faster and more efficiently—and with more opportunity for growth and profit, because of reduced labor and material costs.

We've helped manufacturers in everything from ship-building to retail packaging. And everything in between. Imagine what we can do for you.
