

e3multi®

PRECISION PUMP PANEL

TACKLE MULTIPLE TASKS EFFORTLESSLY

Our e3multi® allows you the utmost in flexibility—you can run up to three different applicators from one unit, accepting a wide range of different fluids. Of course, the e3multi® features the same precision and flow control you've come to expect from the leader in fluid application systems and solutions. Our e3multi's peristaltic pumps can be controlled via the simple-to-use HMI touchscreen or via digital or analog input. What's more, you can set the e3multi® in auto mode, making it compatible with any system. Best of all, the e3multi® can be configured quickly and easily using the HMI touchscreen menus. And, we can set up the e3multi® for your monitoring and control over an Ethernet connection.

TOUCHSCREEN
HMI

2 OR 3
INDEPENDENTLY
CONTROLLED
PUMPS
